## General Comment

Who ever came up with this absurd idea should be fired. I can plan my retirement very well thank you. I don't need my government telling me what I can and can't do to save for retirement. You have to be really joking on this one... I mean really? And the only reason I'm not putting contact info down is we just received a letter from the IRS that you let someone see our tax filings over the Internet. They now have our identity, our kids social security numbers, the bank account numbers, etc. If I really can't trust you with keeping my personal tax information secure, how could you possibly expect me to even consider letting you tell me how to save for retirement. My government protecting me from the bad guys...you guys are a joke. Now I have to go get Lifelock for the entire family...another unforeseen expense. Thanks.

Hopefully a few Senators read this...or even a few presidential candidates...it's good material with this one.

BTW my right to vote is going to count in the next election...

Regards,
